- Production – July 9

**Legend**
- ![](Start Date)
- ![](End Date)
Currently, PJM Connect prompts users for their accounts via the web browser; must use the following format: DMZ\username

Ex. Google Chrome

The server connect.pjm.com is asking for your user name and password. The server reports that it is from dmz.

Ex. Windows Internet Explorer

After integration, users will be directed to PJM’s Single Sign-On application
Addressing PJM Connect Login Errors

Some users/companies have reported difficulty logging into PJM Connect. After investigating with Microsoft support and internal subject matter experts, external user’s network and/or browser settings appear to be the root cause.

• Immediate action: Coordinate with your internal IT support and PJM Connect Support for assistance with troubleshooting.
• Short-term solution: Use Secure Share to share files with PJM.
• Long-term solution: Integration with PJM’s Single Sign On application on Thursday, July 9.

• Educational recording
Product Details
PJM Connect, PJM’s external SharePoint site, allows PJM personnel and external stakeholders to collaborate and share data.

**Key Product Features**

- Enables users to create robust, individualized sites to organize their projects, initiatives and tasks specific to their needs
- Using SharePoint apps, users can organize document submissions, data sets and calendars all in one site
